# *Welcome to our* **28TH ANNUAL BULL SALE!**

Our bull sale continues to evolve as families evolve and embark on new chapters. We continue to remain a family run operation and our relentless commitment to quality will never waiver. We are optimistic about the cattle industry and know that, without a doubt, its where you can find some of the best people you will ever meet.

The Daines family has owned and operated the Innisfail Auction Market since 1955. The market handles thousands of feeders and breeding cattle and while working there, Grant sees a lot of them. It helps provide us with additional insight as to what is and isn't working. We don't believe in following fads, but rather watching trends and making decisions based on profitability and practicality.

While we enjoy promoting and marketing our genetics in the showing, at the end of the show season, those cattle are put in the main herd and can perform just as well as the rest of our cows, under ranch conditions. We are proud of this set of bulls and the genetics they stem from. Our cows are not pampered, we breed for easy-fleshing, low maintenance, good, honest cows that work. We expect our cows to be adaptable, efficient and functional. We take a great deal of pride in developing

cattle that are able to thrive in practical settings, in an effective and economical way.

The bulls were run on grass for the fall and then came in and have been on silage and straw in addition to their mixed ration and supplement. They are run on a 20 acre field and are pail fed. The bulls have been developed to be ready to go out and get to work for you. As always, we are mindful of temperament. We have a good selection of pedigrees, power bulls and calving ease bulls. Every bull that sells, sells with a passed semen test, no DD bulls will sell.

We would like to invite you to look at the bulls at the ranch, or come to the market and view the bulls from the Monday before the sale, leading right up to the sale. If you are unable to make the sale, please let us know in advance and we will work with you to find the right bull for your program. If you have any questions, please don't hesitate to give one of us a call!

We would like to thank all of our past buyers and bidders for their support. We sincerely appreciate each and every one of you!

We look forward to seeing you at the sale on April 6th!

## HORNED - SCURRED - POLLED

**Horned** - An animal with a horn growth affixed to the skull that has or has not been removed.

**Polled/Scurred** - An animal with rudimentary horn growth that will not develop into a horn. The rudimentary horn growth may or may not become affixed to the skull at an older age.

**Polled** - An animal with absence of horn growth. (An animal can have scurs and still be genetically polled).

**Smooth Polled** - A smooth-polled individual has no scurs and does not develop scurs later in life.

**ALL HORNED BULLS ARE IDENTIFIED IN THE SALE CATALOGUE**

## TERMS & CONDITIONS

• All eligible Maine and hybrid bulls will be registered on request.

**Terms of Sale:** The terms of sale are cash or cheque unless other arrangements are made prior to the sale. No release will be given unless satisfactory settlement has been made.

**Responsibility:** Everyone attending the sale does so at his/her own responsibility and without liability on the part of Daines (Innisfail) Auction Market, the consignors, the sales management or their employees.

**Insurance:** Insurance is mandatory on all bull purchases being left until later pickup as bulls become full responsibility of the purchaser. Insurance will be available that day.

**Announcements:** All announcements made from the auction block will take precedence over the printed matter in this catalog.

## GENERAL BULL INFORMATION

- All bulls will be semen tested prior to the sale.
- Scrotal measurements available on sale day.
- \$500 off on purchases of 3 head or more.
- Bulls that are taken home the day of the sale or picked up from the Auction Market by Tuesday, April 11th will receive \$250 off of each bull purchased.
- These bulls are wintered in large pastures, not small pens. This promotes athleticism, soundness and overall physically fit bulls. All of this provides you with more longevity and overall harder working bulls.
- 7/8 Simmental are considered a Purebred in the American Simmental Association registries and supposed to be in Canada soon.
- We guarantee to provide you with a sound breeding bull that has passed a semen test by a licensed veterinarian. Any problems must be reported to the consignor and the buyer is responsible for returning the bull to the consignor immediately when the problem arises. We will have the bull looked at by a veterinarian and determine the course of action from there.
- We strongly advise that you insure your bull, at least for your entire breeding season. We will not be responsible for physical injury or mismanagement, but will work with you to find a solution.
- All animals will carry a standard breeding guarantee as specified by each breed association.
- At no time shall the sellers liability exceed the purchase price of the animal.

## SIGHT UNSEEN PURCHASE

We would like you to attend our sale, but if you cannot, you can have Grant, Kyle or Wyatt personally handle your purchase. Call one of us with your specifications and discuss the offering, preferably a week before the sale. We will gladly assist you with your selections and represent you on sale day. We guarantee full satisfaction upon delivery if you have talked to Grant, Kyle or Wyatt.

Here is a big-time opportunity to get in on some breed leading genetics! This bull's full brother, WGD Ruger 8J, was our high seller in last year's sale for \$72,000 to the great folks at Springside Cattle Co. Ruger went on to be the Reserve Champion Bull at Agribition last fall. Two full sisters have sold for \$18,000 and \$22,500. There is a ton of excitement being generated by these genetics and for good reason; the reports of the calves out of Ruger 8J have been nothing short of exceptional and we are very high on the calves out of him in our own program. Precision brings exceptional length and soundness, with a very cool neck extension. What a way to get yourself into something special and get in on these exciting genetics!

Signal Hill is named after Kyle and Wyatt's favourite whiskey and just like that whiskey he is balanced, full-bodied and stout, yet smooth. We showed Signal alongside his mother last fall. They were Champion Senior Female at both shows they went to. His mother is an attractive, feminine, big bodied cow, that has a really nice udder and lots of milk. The right to a flush on Smooch 3F sold in the prestigious New Year's Resolution Sale, for \$10,000 to Lakeview Charolais. She's a beautiful cow and we are very excited about her future in the donor pen! A maternal half brother sold in last year's sale and we also used him as an AI sire. Signal's sire is a previous bull sale high seller to Circle Cee Charolais. Whiskey Bent comes from our highly coveted Miss Trim cow family that has done so much for us. The Miss Trim progeny are really easy fleshing cattle. Signal is really good footed, big boned, sound and good haired. He's also such a gentle guy! Take into account the way Signal Hill is made, his proven pedigree and his very easy-going demeanor and you can't go wrong with him!

When the opportunity came from Harvie Ranching to get in on Tried & True semen we couldn't resist. One look at him and we were eager to utilize him in our program. When you look at this bull you can see a lot of the same traits as his sire. This bull tracks extremely well and has a presence that you can't help but notice. He does this while carrying lots of red meat. His mother is a cow we purchased from Thistle Ridge and she is always a favourite on tours due to her perfect udder and overall profile. Here are some cool genetics and a very complete bull that will get the job done.

When you see bulls like this you can see why we are so high on our LT Ransom calves. Not only has Ransom sired top selling bulls and females, he's a cool outcross. This bull's mother is a big framed cow with lots of power. You have to really appreciate the length of spine and overall structure of this bull, with his ability to put pounds on. This calf market is hot and pounds sell, this guy will provide the pounds. Brig, who was 5 when this bull was born, got to name him and was set on Outdoor Boy, so Outdoor Boy it is!

This is one soggy and stout made bull. He's packed full of meat and is really deep flanked. The Ransom sire did an awesome job for us. We calved out a full sister to this bull and we would gladly take a whole herd just like her - big bodied, beautiful udder, great footed, easy to handle and very maternal. 86K's mother is one of our favourites. 14C is a tank of a cow - she's always one the fleshiest cows no matter the time of year or feed situation. Her calves always make high quality replacement females or bulls for the sale. She's also the biggest pet on the farm and the one the kids like to sit on. We are using a maternal half brother to 86K as our senior herd sire, you will see a few of the ONL Hot Toddy sired calves in the sale. Hot Toddy is doing an awesome job for us! Lots of predictability here, in a quality made and quiet to handle package. Homo-polled by pedigree.

When we started this Charolais journey, I toured the Springside herd and found a heifer calf I had to have. When you see bulls like this, the investment was definitely worth it. The 62C cow has produced lots of front pasture type calves for me. 91K goes back to JIL Thunder Roll 69Z, who has had a tremendous impact on our herd, siring quality bulls and females alike. 91K's sire, Hot Toddy, is following in his sire's tracks and is becoming a major part of our program. A maternal half brother was sold to Anderson Land and Cattle last year and the year before to Dale Glazier in Oklahoma.

The dam of this bull is heading to our donor pen. She is a full sib to Lot 10. We have been considering it for awhile, but this guy clinched it. He has that added length, a top packed full of muscle, right from his fore rib out through his hip. One of the best quality's of this bull is the fertility in the females in his pedigree, they cycle readily and almost always conceive with AI. This bull has that show ring look with a quality head. His sire, Hot Toddy, is a powerfully constructed, easy fleshing bull. The grandmother, 14C, is the dam of Lot 5. The 14C cow had a successful show career and is a top producer as well. Lots to like with 13K!

This bull is a full brother to the sire of Lots 17 and 18. 15K has that quality, herd bull head. We can't say enough good about the Thunder genetics. Whether it be the showing, or the auction market ring, the Thunder cattle flat out work. We love the Thunder daughters working as cows in our herd and the Thunder bulls always make the sale. Our current walking herd-sire, Hot Toddy, is out of a Thunder daughter.

Totally Hip was the Reserve Champion Percentage Bull at Agribition. This bull is a truly elite, game changer type of bull that could launch your program to the next level. His dam was a bigger framed, really good looking tank, that we sadly lost due to an unfortunate injury. His sire has done a great job as an AI sire for us. We sold a Trail Blazer daughter in Friday Night Lights to Scissors Creek Cattle Co. Aside from having the coolest look about him, Totally Hip is structurally made so right and moves like a cat, off a great foot. He's big boned, heavy muscled and has wicked cool hair – and then he pulls it all together with a rocket front end and that quality, herd bull head. He has a lot of natural presence and is really sensible to work with. We think very highly of Totally Hip and feel that he is a bull that deserves a serious look!

You can see the eye-catching white face and quality of this bull, what you can't see is how nice his dam is. Without a doubt, this bull has one of the truly great dams in our program. She is still here in production because of her quality traits, her fleshing ability, great feet, fertility and an udder that has stood the test of time. These traits, which lead to longevity of production, are certainly traits you want to have in your herd. Both the 7X cow and the Highmore bull have left us with many quality replacement females and bull sale bulls.

This is a very long and powerfully constructed bull, who is the one we would pick to sire lots of baldies. He has always been really quiet and good to handle, but was a little uncharacteristically nervous in the picture pen. He's completely fine in a group setting. Ensuring we give you an honest representation of our bulls is important and that's why we pass on information like this. His mother is a good-looking baldy cow with lots of milk.

Long bodied, big topped, really stout and really cool made. He profiles really nice from the side and doesn't disappoint when you get in behind him — his wide top extends out over his hip and into his lower quarter. The dam of 94K and the dam of Lot 19 are full sisters. We are creating these crossbred cattle very intentionally, using some of our top Angus females, such as 54A, and crossing them with the Solution bull. Solution is really structurally correct and we are very happy with the calves out of him. The 54A cow, is the grandmother of Lot 40.
